

The MIL standard HC-37/U cold weld enclosure is ideally suited for the manufacture of precision SC cut and AT cut high reliability resonators. Available in a choice of three case heights.

A wide frequency range combined with a high vacuum environment makes this an ideal choice for high Q applications.

The four point mount provides excellent shock and vibration performance with good immunity to G sensitivity.

Custom specified with typical data as follows:

Specification data:

Storage temperature

Environment high vacuum **Quartz orientation** SC cut and AT cut

Frequency range (3 ~ 25)MHz fundamental (5 ~ 70)MHz 3rd overtone (50 ~ 120)MHz 5th overtone

Adjustment tolerance from ±1.5ppm at ref. temp. frequency dependent

Thermal stability OCXO turn point from ±3°C

TCXO from ±0.5' equivalent Ø angle XO from ±3ppm
